

Server, Desktop,
Notebook, Storage

System Area Manager from SyAM Software

A Single Tool Centrally Manages IT Assets, Saving Time And Money

Manage Multiple Systems

System Area Manager provides a central interface to manage all brands of servers, desktops, notebooks and storage devices running our System Client software.

Simple To Deploy And Use

System Area Manager installs in a few minutes and includes all required components, enabling users to be up and running quickly. Once installed, SyAM Software System Clients can be added to the central management tree, enabling the suite of centralized management functionality.

Deployment Utility

Our new deployment tool allows our software and 3rd party applications to be deployed silently across the network where users define custom installation parameters. It also enables vulnerability scans identifying

missing Microsoft updates and installs them remotely to those systems.

Scalable Solutions

Our solution Enables both SMB and Enterprises to manage their systems more efficiently.

Help Desk Productivity - greatly reduces time to resolution by up to 85%.

Asset Management - dynamically gathers and provides real-time IT asset information and change history, enabling the identification of vulnerabilities / compliance issues.

Remote Management - enables remote diagnostics and KVM control to operational and non operational systems eliminating the requirement for 50% of desk side or onsite visits.

Power Management - allows system enforced power policies to be configured reducing desktop energy costs by 40%.

SyAM Software™

System Area Manager Features

Asset Management

- Change Alerting
- Reporting
- Configuration

Event Logging

- Asset change tracking
- Asset history

Alerting

- System and Centralized levels
- Configurable – Sensor / thresholds / notification methods
- Integration into Enterprise frameworks

Remote Management

- Remote power management
- Remote console – KVM control
- Out of Band Management (AMT/IPMI)
- Remote Application Control

RAID Controller Technology

- SCSI, Serial ATA, SAS

Supported RAID Vendors

- 3Ware (AMCC)™
- Adaptec™
- Intel™
- LSI Logic™
- HP™

Management Standards Utilized

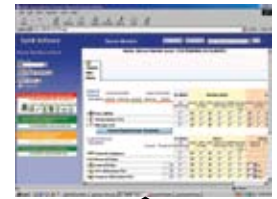

- ACPI 2.0, IPMI 1.0, 1.5, 2.0, SMBUS, SMBIOS, AMT, ASF, DMI, SNMP, PET 1.0, Vendor Proprietary APIs

Operating Systems

- Windows™ Vista
- Windows™ 2000 Professional, XP Professional, 2000 Advanced Server, 2003 Server
- Redhat™ Enterprise Server, Workstation Desktop, SuSE™ Enterprise Server, Professional
- Novell™ Linux Desktop
- Fedora™ Core

System Area Manager

A web based management console that provides a single interface to manage all the system clients in a site.

System Client

Intelligent agent that dynamically discovers and monitors its assets, detailed hardware and software configurations and operational sensors on a single computer.

Management Feature	System Client	System Area Manager
Asset Discovery And Monitoring	X	X
Remote Keyboard Video Mouse Control		X
Remote Out Of Band Management (IPMI/AMT)		X
Power Management		X
Asset Change Tracking, Alerting And Reporting		X
Physical/ Logical RAID Storage Monitoring And Configuration	Monitor Only	X
Utilization And Performance Monitoring		X
Configurable Alerting Email/SMS/Pager/SNMP	Email Only	X
Enterprise Framework Integration (SNMP And System Event Log)		X

Our Products

- System Client
- System Area Manager

Our System Client software can be downloaded and deployed, free of charge, across all of your Server, Desktop or Notebook platforms running Windows and Linux.

Our System Area Manager software can be downloaded and tested for 15 days. There after, license fees are applicable based upon the number of systems being managed.
