

Server, Desktop,
Notebook, Storage

System Client from SyAM Software

A Single Tool Pro-Actively Monitors All Brands Of Systems And Storage Resources

Manage One System At A Time Free Of Charge

System Client allows you to manage servers, desktops and notebooks individually, one system at a time. Our solution enables businesses of all sizes to utilize a single product to proactively manage all brands of x86/x64 systems running Windows and Linux.

Simple To Deploy And Use

System Client installs quickly in a couple of minutes and dynamically discovers your system's operational environment, providing real-time monitoring without any user intervention. System Clients can be deployed quickly across the network to hundreds of targets utilizing SyAM Software's deployment tool.

Scalable Solutions

When System Client is deployed with System Area Manager, alerting, remote management, asset management and other centralized functions unlock the power of this solution.

Up to 2000 System Clients can be managed via a System Area Manager. System Clients can also be used as a stand alone product, providing a single system user interface with minimal user configuration to provide predictive failure alerting via email.

Operational Monitoring – Dynamically discovers your system's operational environment, enabling real-time monitoring, alerting on potential issues and root cause.

Storage Monitoring – Enables monitoring and alerting of issues identified across your physical, logical and RAID storage devices.

SyAM Software™

System Client Features

Asset Monitoring

- Software/hardware change tracking

Environmental Monitoring

- Physical chassis intrusion, temperature, fans, voltages, power redundancy loss

Network Monitoring

- Network connectivity loss

Storage Monitoring

- Physical disk failure, pending failure (SMART)
- RAID Set failure,
- Logical disk capacity utilization

Performance Utilization Monitoring

- CPU utilization
- Physical and virtual memory utilization

Memory Monitoring

- ECC single bit multi-bit memory errors

Supported RAID Vendors

3Ware™ (AMCC)

Adaptec™

Intel™

LSI Logic™

HP™

Management Standards Utilized

ACPI 2.0, IPMI 1.0, 1.5, 2.0, SMBUS, SMBIOS, AMT, ASF, DMI, SNMP, PET 1.0, Vendor proprietary APIs

Operating Systems

Windows™ Vista

Windows™ 2000 Professional, XP professional, 2000

Advanced Server, 2003 Server

Redhat™ Enterprise Server, Workstation Desktop

SuSE™ Enterprise Server, Professional

Novell™ Linux DEsktop

Fedora™ Core

System Client

Intelligent agent that dynamically discovers and monitors IT assets, detailed hardware and software configurations and operational sensors for a single computer.

Server

Desktop

Notebook

Management Feature	System Client	System Area Manager
Asset Discovery And Monitoring	X	X
Remote Keyboard Video Mouse Control		X
Remote Out Of Band Management (IPMI/AMT)		X
Power Management		X
Asset Change Tracking, Alerting And Reporting		X
Physical/ Logical RAID Storage Monitoring And Configuration	Monitor Only	X
Utilization And Performance Monitoring		X
Configurable Alerting Email/SMS/Pager/SNMP	Email Only	X
Enterprise Framework Integration (SNMP And System Event Log)		X

Our Products

- System Client
- System Area Manager

Our System Client software can be downloaded and deployed across all of your Server, Desktop or Notebook platforms running Windows and Linux for free of charge.

Our System Area Manager software can be downloaded and tested for 15 days. There after, license fees are applicable based upon the number of systems being managed.

About SyAM Software

SyAM Software is a developer of systems area management solutions that help SMBs and enterprises operate more efficiently and save money.
